

company formation...

Company formation, sometimes referred to as company registration, is the process of incorporation so that the business is considered a separate entity to the people who own or operate the business.

Companies can be created by individuals, specialised agents, solicitors or accountants.

Today the majority of UK companies are formed electronically. However, we provide advisory services beyond the standard company formation service. We can have a company formed and ready for business instantly, with all the required paper forms in your possession within 24 hours.

We are able to assist with...

- Forming a new limited company
- Advising on capitalisation of the company
- Advising on administration of the company
- Setting up of a PAYE scheme for the company
- Registering of the company with HM Revenue & Customs for Corporation Tax and VAT purposes

Other support services available include...

- Preparation of statutory accounts
- Statutory audit
- Corporation tax compliance and consultancy
- Bookkeeping services
- Accountancy software advice & support
